# Highlights for July 2024 Data

- PV capacity additions are 1,191 MW; wind capacity additions are 517 MW.
  - MW = megawatts; GW = gigawatts (1000 MW); TW = terawatts (1000 GW)
- New York added 130 MW of offshore wind, which is the largest U.S. offshore wind farm.
- PV and Wind generated 14.0% of total U.S. electricity generation in July.
- For the first month on record, U.S. PV electricity generation tops wind electricity generation.
- PV panel imports are \$1.4 billion, which supports strong U.S. PV capacity additions.
- For the month of September, TAN ETF (solar) share price gained 4.4%, and FAN ETF (wind) share price gained 6.2%.

# Slideshow Objectives

- To Document Monthly and Annual Growth in PV and Wind Capacity and Electricity Generation
  - MW = megawatts; GW = gigawatts; TW = terawatts; MT = thousand metric tons (polysilicon)
- PV and Wind Capacity Additions
  - The Graphs Show Current and Past Year Monthly PV and Wind Capacity Additions
  - For Perspective, Compare Current Monthly Capacity Additions to the Long-Term Goals
    - U.S. PV Long-Term Goal (2040 forward)
      - Monthly Average – 8 GW of Capacity Additions
      - Annual Average – 96 GW of Capacity Additions
    - U.S. Wind Long-Term Goal (2040 forward)
      - Monthly Average – 4 GW of Capacity Additions
      - Annual Average – 48 GW of Capacity Additions
    - World PV Long-Term Goal (2040 forward)
      - Annual Average – 700 GW of Capacity Additions
    - World Wind Long-Term Goal (2040 forward)
      - Annual Average – 300 GW of Capacity Additions
- Slides Present U.S. Monthly PV, Wind and Fossil Fuel Electricity Generation to Show Seasonality
